PAYS TRIBUTE TO JEM MACE, GREAT MASTER OF ENGLISH RING

BY HARRY B. SMITH.

San Francisco, Dec. 2.—Unknown to the present generation of followers of pugilism, and at best a memory to those who have read the history of the sport of boxing since the days of its inception in England, more than half a century ago, the passing of Jem Mace cannot go unheralded. This Englishman, who was the undisputed champion for more than ten years, left his mark in no uncertain fashion, and if he did nothing else, it can be said to his credit that he was responsible for that genius of the ring—Peter Jackson.

The writer cannot claim other than a knowledge of Mace gained through books that have been published dealing with the sport, but there still remain those in California who have seen Mace box, and I am indebted to Hiram B. Cook for a description of Mace that could not have otherwise been secured. For many years a leading light in the California club, giving boxing exhibitions as one of the attractions.

Jem Mace, according to Cook, came to California some thirty or more years ago. He was at that time traveling with John Wilson's circus, giving boxing exhibitions as one of the attractions. "Jem Mace came here with Billy Edwards, for many years a lightweight champion of England, who acted as his sparring partner. The circus showed on Jackson street, and Charlie Bennett, then the strong man of the Olympic club, engaged in a friendly set with Mace. Mace, who weighed only 160 pounds, was the most beautiful boxer I have ever seen in the ring. He was quick, scientific and wonderful to behold.

"In those days they didn't box to knock you out, but to show that they

could hit their opponents. I would rather see Jem Mace in one three-minute round than anyone else I have ever watched for twenty rounds.

"From California Mace went to Australia, and it was following his trip to the Antipodes that there came about the revival of boxing in Australia. Everyone of those early-timers who afterward came to this country and became national figures, bore the stamp and impress of Jem Mace. From featherweights to heavies it was easy to see that they had acquired the style of Mace. Larry Foley and Peter Jackson are among those who can be said to have come from the Mace school of boxing.

"I wouldn't say that Corbett was of the same school as Mace. If there is anyone to whom that old man of England could have been compared it was Peter Jackson. He was a boxer, with the grace and beauty of action of an artist, and a man who never for a moment forgot the science of the game.

"As a boxer, they can't touch Jem Mace. As a fighter, perhaps, it would have been a different story, for those comparisons are so hard to make. Jack Johnson might, perhaps, have whipped Mace, but as a boxer, pure and simple, he would have been outpointed. I can see Mace in action as I am telling you this, and I will never forget him."

COAST FANS MAY SEE SOME REAL AMATEUR BOXING

San Francisco, Dec. 3.—A determined move to promote and encourage amateur boxing in the western states of the world has been taken up by the Pacific Athletic club. The club has drawn up a set of rules covering the amateur status of a boxer, and they must be lived up to. At McCarey's pavilion, December 9, a big amateur show will be staged under the amateur rules, which were adopted as follows:

Amateur boxers in good standing may join the amateur branch of the Pacific Athletic club upon payment of 25 cents initiation fee, and thereafter "will be eligible to take part in the amateur boxing contests given by the club in Los Angeles at Naud Junction. An amateur shall be defined as a boxer who shall not have taken part in a professional contest for a championship at his weight, and who will accept only a medal or trophy in any bout in which he may participate.

All contests shall be held according to the ordinance No. 21,197, New Series, passed by the city council of Los Angeles, October 18, 1910, governing amateur contests. The value of the medal or trophy given the winner of each contest shall not be over \$55. The contests shall be scheduled for not less than four rounds nor for more than ten rounds.

The referee shall be instructed to stop a bout when a winner is apparent or when one of the contestants is in such weakened condition that a continuance might result in harm to such contestant. Physical examinations shall be made

by the club physician of all contestants named previous to the time named for entering the ring, and only those found fit shall be allowed to take part in the contests.

No contestant shall be allowed to use what is known as the "kidney punch" on his opponent during a contest.

Seven-ounce gloves properly padded shall be worn by the contestants in all of the amateur contests of the Pacific Athletic club.

No contestant shall be allowed to engage in more than one bout in one evening.

The Marquis of Queensbury rules shall govern on all points not covered by these articles.

Decisions, which shall be final, shall be made in the ring by the referee at the conclusion of the contests.

No boxer under seventeen years of age shall be allowed to take part in the contests.

The ring in which the contests shall take place shall have the floor covered with canvas under which there shall be a layer of sawdust so that a fall by one of the contestants may not result in injury.

HERE IS THE VERY LATEST; WHY NOT STEAL TO FIRST?

WASHINGTON, Dec. 3.—While all of the baseball men are racking their brains for ideas on rule revisions that will put more men on the bases, and thus liven the game, it has remained for a Washington fan to come through with a more radical suggestion than anyone else has dared to advance. This fan, who is a regular attendant at the local games, but whose name is withheld, has advanced his ideas to a Washington paper.

It's an old baseball saying that "they never get fast enough to steal first base." But they would, if this man's ideas were adopted, for, after the pitcher starts to deliver his first pitch to any batsman the latter would be privileged to tear for first base. Thus, no matter what the count on the batter, he could take first on any passed ball or wild pitch. Or, with men on the bases, he could dash to first at any time to draw a throw for some other runner.

Yes, a Very Wild Scheme.

In effect, the better would have exactly the same base running privileges as men on the bases. It sounds like a wild scheme, and certainly would never get by the rule makers.

But its proponent makes a good argument. If there is to be any improvement in the game, he pleads, it comes in the nature of work on the bases. This is the only department of the game in which team work really counts. And, he says, interest would be added to the game.

"Suppose," says the writer, "the man at bat were allowed to steal first base at any fair chance, after being legally at bat; that is, after the ball had left the pitcher's hand for the first time after facing him. Would not this bring a new angle to the game, and nullify the groaning lack of interest in these no-hit, no-run contests, where we see much lunging, much sweat, much labor, and much tense apathy on the

MANY BASEBALL LIGHTS FOR LEAGUE MEETING

L. F. Thell, owner of the Salt Lake franchise in the Union association, leaves Monday for Butte to attend the first league meeting, the date of which has been definitely set for December 7. Mr. Thell said last night that present at the meeting ready to bid for franchises would be George M. Reed, manager last season of the Mobile club in the Southern league; Ducky Holmes, manager last season of the Toledo club in the American association; Charles Carr, manager last season for Indianapolis in the American association; Billy Neal, former secretary to Barney Dreyfus of Pittsburgh; Dave Rowan, manager last season for Peoria in the Three I league; Harry F. Allen of Twin Falls, Jack Cody of Boise, L. F. Thell of Salt Lake, John J. McCloskey of Butte, and a representative from Missoula. W. H. Lucas, who is slated for president, secretary and treasurer, will also be there.

"Everything looks fine for the Union association," says Thell. "After December 7 we will have plenty of news to give out."

"Father Tom" Kelly returned from Twin Falls yesterday with the report that indications there are favorable to the Union association. He says a meeting will be held this week for name the delegate to the meeting at Butte.

UTAH 1910 ELEVEN IN LAST LINEUP

UNIVERSITY OF UTAH ELEVEN, 1910.

Left to right, top row—Peterson, end; Coach Bennion, center; Christensen, guard; Richardson, fullback; Assistant Manager Midgley; Olsen, tackle; Young, guard; Manager Sneddon; Grant, quarter. Middle row—Romney, half; Dean, end; Gardner, end; Captain Home, tackle; Carmichael, end; Riser, end. Bottom row—Ott Romney, quarter; Price, end; Bennion, half; Sommers, end.

THE University of Utah eleven of 1910 appeared in "war paint" the last time last week for the official picture, which is shown above. In the group is shown practically all of the varsity football material at the institution, but from the sixteen men Coach Bennion turned out a great team.

The twenty to nothing victory over the Denver university is the shining light of the schedule, and Utah showed football on that day of a championship caliber. Utah has bright prospects for 1911. The Utah freshmen eleven has some fast material, and Coach Bennion and Captain Lon Romney will have a fast squad to work with.

AMERICAN LEAGUE SHOWS HIGH-CLASS FIELDING

Chicago, Dec. 3.—Hauser of Philadelphia was the leader of first basemen in the American league fielding averages made public today. He played in twenty-nine games, with a record of 1,000 per cent. Stovall of Cleveland, in 128 games, had the highest number of put outs to his credit, 1,404, with a percentage of .985.

Collins of Philadelphia leads the second basement with 153 games, 402 put outs and a percentage of .970. Lajoie of Cleveland is his close second, with 149 games, 387 put outs and a percentage of .966.

Conroy of Washington leads the third basement, his record being sixty-one put outs in forty-eight games, with a percentage of .961.

Turner of Cleveland leads the shortstops with ninety-four games, 194 put outs and a percentage of .973. Easterly of Cleveland has a percentage of .960 among the outfielders, having played in thirty games with thirty-nine put outs and five assists. Pitchers who fielded 1,000 are Young of Chicago, Fanwell of Cleveland, Mayhew of New York, Adkins of Philadelphia and Killian of Detroit. Among the catchers, Donahue of Boston and Philadelphia alone had a perfect record.

ATTENTION OF DUCK SHOOTERS IS WANTED

F. W. CHAMBERS, state fish and game warden, wishes to inform the Salt Lake City sportsmen, and particularly the duck shooters, that the city sewer dumping ground, near the mouth of the Jordan river, needs attention. Mr. Chambers and the experts who have worked on the recent duck infection agree that the poor sanitary condition of the breeding grounds was responsible for the malady among the water fowl this summer and fall. That the refuse from the city sewer was an important factor in causing the malady is also pointed out.

The duck shooting season in Utah for 1910 has been practically a failure. It has been a disappointment to thousands of sportsmen, and the famed name of the Bear river grounds as a sportsman's paradise was dimmed for the first time.

Gun clubs and hunters in general are urged to take steps at once so that by a united action it will be made possible to remedy the conditions along the Jordan river caused by the city sewer.

A general meeting to discuss the proposition will be called in the near future.

INDOOR SPORTS NOW IT GOOD LEAGUE ASSURED

University Athletics Have Promise of Long List of Games During Winter Months.

A big boom in winter sports at the university is scheduled for the coming week. After one of the most strenuous football seasons, indoor sports will be the center of interest from now on. Basketball, indoor baseball, handball and wrestling will all receive the attention of the coach.

Bennion has the best basketball material this year in the history of the sport at the U. All of last year's men are out, and with the possible exception of Horsfall will be eligible. A big bunch, stars from last year's class teams, have announced their intention of going after the places on the first team. The announcement that the basketball men would have a ten-day trip through Colorado to stimulate interest in the game to a great degree and some hard scraps for places are looked for.

Coach Bennion will also spend a good deal of time and energy this winter with the wrestlers. An announcement posted in the gym to the effect that the coach was open for engagements by the wrestlers brought more replies than expected and several classes will be organized. Inter-class wrestling matches, with a view to deciding the school championship, will be arranged.

It is Bennion's desire to arrange some intercollegiate meetings also.

The date for the football men to receive their awards has been set for December 16 and will be an annual affair known as honor day. The annual banquet given the football team by the alumni will be given the same evening and will be the last appearance of the football men as a team.

A letter has been received from the manager of the University of Idaho stating that the Idaho aggregation will be willing, and are anxious, to make a Thanksgiving date with Utah for the 1911 season.

one, so that the match this week will be the rubber. The three-cushion game is now very popular in Salt Lake, and the match will be followed with much interest.

MEN! COME TO ME

If I Do Not Cure You It Will Not Cost You One Cent—NO CURE NO PAY.

MY SCIENTIFIC METHODS

What would you not sacrifice to feel as you did a few years ago, to have the same snap and energy, the same gladness, joyous, light-hearted spirit and the physical strength you used to have? You know you are not the same man, and you know you would like to be. You might as well be. It's easy. I am making men out of wrecks every day by scientific methods and I can make you as good as new. I want to cure you in a short space of time.

My scientific methods make vigorous, muscular men out of the puniest specimen of "half men"; expand and develop every muscle and part of the body; warm the heart, increase the courage and give a man power of mind and body such as any man should be proud of. Make the eye bright and the step elastic; make an athlete of a sluggard. Cure the disease. The scientific methods will cure when all else has failed.

My arguments are good, my system is good, but I know you haven't time to study these. You want proof and I am able to give you that, and lots of it. When your own neighbor tells you I cured him you will know I did. In a few days you will feel the cure tingling in your veins. It will feel good to be strong and manly again. Diseased and discouraged men, come and talk your trouble over with me. I can and will cure you.

GUARANTEED CURES

Many patients have told me, after I cured them, that they hesitated at first to come to me, on account of never having received relief elsewhere, and they had almost become so skeptical as to think there was no cure for their ailments. I want an opportunity to treat just such cases, and it makes no difference about the financial part, as I never accept pay for my services until I accomplish a cure, if there is any doubt about the cause being curable by my scientific method. I am the only Specialist in Salt Lake who makes NO CHARGE unless the patient is entirely satisfied with the results accomplished and who gives a written guarantee of not a cent to be paid for services if a complete and permanent cure is not effected.

I TREAT MEN AND MEN ONLY

THE LIFETIME CURES AND SATISFACTION GIVEN THOSE WHO HAVE BEEN CURED OF THE DISEASES BELOW BY MY METHODS SHOULD BE A GUIDING STAR TO ALL MEN SEEKING TREATMENT.

Urinary Obstruction

is a very annoying and injurious disease, and is important because of its harmful effects upon the whole urinary system. I treat each case according to its requirements, first satisfying myself as to the exact condition by careful examination and inquiry. Urinary obstruction in any form is difficult to cure, and by my method of irrigation and catheterization, I am able to cure the most severe cases. I do not cut or dilate and when I have dismissed a case the canal is sound and healthy and perfectly normal.

Special Diseases I treat, including, swelling, painful passages, a running, strong injections, drugstore remedies seldom cure—they cause obstructions of the Urinary Canal. My treatment stops every symptom and cures in a few days. It is scientific—that's the only sure way to be cured.

I can cure you so quickly and easily that you will be surprised. I will give you just the result and cure you are looking for at the least possible cost.

Bladder Trouble Usually is a very annoying and injurious disease, and is important because of its harmful effects upon the whole urinary system. I treat each case according to its requirements, first satisfying myself as to the exact condition by careful examination and inquiry. Urinary obstruction in any form is difficult to cure, and by my method of irrigation and catheterization, I am able to cure the most severe cases. I do not cut or dilate and when I have dismissed a case the canal is sound and healthy and perfectly normal.

Prostatic Enlargement Results from inflammation, obstructs the canal, produces constipation. My special treatment removes the inflammation, reduces the enlargement, a normal condition is resumed and ninety per cent of the cases I treat are entirely cured.

Varicoes is simply veins filled with blood, which are enlarged or stagnant blood occurring in any part of the body. Every man afflicted with Varicoes of long standing knows that it has blighted his life and that he has made a great mistake in not having himself cured.

My method of curing Varicoes is by a powerful and painless electro-combination, which contracts the enlarged veins, thus expelling the clotted blood so that circulation is resumed and Varicoes is no more. The nervous system is restored by the administration of a tonic and a complete cure is certain in every case.

PILES are small vascular tumors, which are very annoying and most degrading influence on the general health. I cure Piles without cutting, nor do I use any ligatures or caustic acid injections, which treatment has ruined many. My treatment is safe and painless, causing no detention from business and when you are dismissed by me you are cured for life.

Kidney Complaints often result from excesses, alcohol, liquors and severe sickness; the usual symptoms being chills and feverishness, a burning feeling, painfulness under the eyes, burning and swelling. My long study and extensive practice in treating Kidney diseases cures success in all cases, not past the curative stage. I determine the condition by analysis of urine, and the many severe kidney troubles have been cured, after they had been given up by other doctors, gives me great confidence in my method.

Blood Disease is a manifest stages known as primary, secondary and tertiary. Any form of this destructive disease makes itself known by such evidences as inflammation of the mucous membrane in the mouth and throat, eruptions on any part of the body, aches of the bones, spots and discolorations of the skin, which signify decay and premature death.

My treatment for "Blood Disease" is a specific composition that completely reorganizes the blood corpuscles, by which means every particle of injurious matter is eliminated. Under my system treatment it is utterly impossible for virus to remain in the blood, and purity and health are the results in every case. My scientific treatment removes all manifestations of disease soon after beginning treatment and by increasing the albuminous portion of the blood after removing the impurities a normal state of health is resumed.

Hydrocele is a swelling of the scrotum and is sometimes difficult to distinguish from rupture or varicoes. The remedy I use for curing Hydrocele completely obliterates the tumor at once, and by the use of an internal preparation for a few days not a sign or symptom of the disease reappears.

Nervous Decline or Debility means DEBILITY of the nerves and nerve centers, or general debility of the whole nervous and muscular systems. No man can be strong and manly if his nervous system is impaired, because the nerves control the blood and when the proper circulation in any part ceases disease is bound to result.

In treating pelvic diseases, from which nearly all nervous disorders arise, I have discovered a very particular advantage over other physicians because I have thorough knowledge of the cause and cause of the disease, which is always necessary to insure success in treating any affliction. My thorough course of treatment immediately stops nervousness, drains, relieves backache, all effects of youthful folly, and by adding flesh and muscle the patient is restored to health, strength and complete manhood. Be a manly man.

Examinations and Consultation Free

Office Hours: Week days, 9 a. m. to 5 p. m., 7 to 9 p. m. Sundays, 10 a. m. to 12 noon. Although I am a very busy doctor at all times, on account of my large practice, I invite any man whose health is not what it should be, to call at my office and consult me about his case (free) at any time during the above hours. You will receive courteous attention at my hands. I see my patients personally. My services in
